

BSE Institute's market competition in Abu Dhabi

BSE INSTITUTE, in collaboration with IBMC Global, has launched the BSE Financial Trading Competition at the Abu Dhabi National Exhibition Centre as a part of the WorldSkills 2017, the world's largest skill event. The competition will be held up to October 18, across four different asset classes — equity derivatives, bonds, currency derivatives and commodity derivatives. Participants would be using BSE's trading platform Bolt on the web. Bolt is the world's fastest trading platform. During the competition, teams would get virtual money to trade in a simulated environment. They use financial skills to buy or sell stocks on a trading platform.
